REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record includes an electric toothbrush comprising a housing, an electric motor with a motor output member, a first transmission linked to the motor output to convert rotational movement into rotational reciprocating movement at a first average angular speed and a first average angular sweep about a first transmission axis, a second transmission linked to the first transmission to convert rotational reciprocating movement from the first transmission into rotational reciprocating movement at a second average angular speed and a second average angular sweep about a second transmission output axis, wherein the second average angular speed is greater than the first average angular speed and the second average angular sweep is greater than the first average angular sweep.

Ullrich discloses that the second average angular speed with a sweep is smaller than the first average angular speed and sweep and therefore, claim 11 is not anticipated by Ullrich's device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura C. Cole whose telephone number is (571) 272-
